UDACITY

Introduction to Generative AI with AWS
Project Documentation Report

Complete the answers to the questions below to complete your project report. Create a PDF of the completed document and submit the PDF with your project.

Question	Your answer:

Step 2: Domain Choice
What domain did you choose to fine-tune the Meta Llama 2 7B model on?
Choices:
  1. Financial
  2. Healthcare
  3. IT
	IT

Step 3: Model Evaluation Section What was the response of the model to your domain-specific input in the **model_evaluation.ipynb file**?	**Input:** Traditional approaches to data management such as **Response:** relational databases, have not kept up with the increasing demands of the modern data-driven organization. These databases were designed for transactional workloads, not analytics. They are also rigid, requiring developers to work in a specific language and format. As a result, developers are forced
Step 4: Fine-Tuning Section After fine-tuning the model, what was the response of the model to your domain-specific input in the **model_finetuning.ipynb file**?	**Input:** Traditional approaches to data management such as **Response:** data warehouses and data lakes have failed to provide the agility and flexibility needed to keep up with the pace of change in the modern data landscape. With the emergence of big data, data management has become more complex and requires a more sophisticated approach.\nIn this article, we
